1 Objective

We are working together in a large interdisciplinary team on developing a large document in \LaTeX. We are seeking for a student assistant to support us with the development of large \LaTeX-based documents. Your task will be to support researchers from different groups while working with \LaTeX. This task includes warning and error resolution as well as transferring texts to \LaTeX. In particular this involves:

- Helping researchers from different disciplines with \LaTeX
- Finding and solving problems in \LaTeX document compilation
- Translating documents into \LaTeX document format
- Tracking the changes during document development

2 Requirements

- Conscientious and precise way of working
- Experiences with \LaTeX
- Good knowledge of the English language
- Experiences with Git source code versioning system

If you are interested, please apply via email. Please include information about your experiences with \LaTeX.
